

Rationale: Cardinal Wiseman's approach to history can be summarised in three words; **researched, relevant and rigorous:**
Researched - we strive to teach our students a curriculum that is based on the most up to date work within the academic field of history.

Relevant - We believe that the history learnt by students needs to be relevant to the world they live in and the lives they lead, this helps equip students with knowledge that allows them to interpret the world around them.

Rigorous - we have developed ambitious schemes of work that are academically challenging and designed to push all students towards their very best
